

For a Great Cause

A Special Wish Foundation – Dayton Chapter hosted their annual Valentine’s Dance Fundraiser on February 8 at Wright State’s Nutter Center. It was a wonderful night of dancing and great music and boasted the much-anticipated “Dancing with the Dayton Stars” dance competition. The event featured eight local community leaders paired with professional dancers as they left it all on the dance floor in their quest to capture the coveted mirrored ball trophy.

Our very own Matt Overton (Regional Sales Manager, ChemStation – Dayton/Pittsburgh/Richmond) and dance partner Sara Andrews (Dayton Dance Centre) participated and had an amazing performance to the music of Michael Jackson’s *Thriller*!

All proceeds from the dance went directly to granting the wishes of local children who have been diagnosed with a life-threatening illness. A total of \$80,000 was raised from this event and ChemStation was *thrilled* to be a part of it!

Preventing Workplace Injuries

According to the National Safety Council, a worker is injured on the job every seven seconds. Below are the top workplace injury events resulting in lost work days and their tips to help avoid these injuries.

- **Overexertion** – Lifting or lowering; repetitive motions. **Helpful tips:** Avoid bending, reaching and twisting when lifting; Take frequent short breaks.
- **Contact with objects and equipment** – Struck by or against object or equipment; Caught in or compressed by equipment or objects; Struck, caught, or crushed in collapsing structure, equipment or material. **Helpful tips:** Store heavy objects close to the floor; Be aware of moving equipment/objects in your work area; Wear the proper personal protective equipment.
- **Slip, Trips, and Falls** – Falls to a lower level; Falls on the same level. **Helpful Tips:** Place the base of ladders on an even, solid surface; Use good housekeeping practices.

Common Recyclables – Used Oil

Choosing to recycle is great, but you want to make sure the items are recycled correctly. Below is information from epa.gov about recycling used oil:

Used Oil

Never dump your used motor oil down the drain – the used oil from one oil change can contaminate one million gallons of fresh water. By recycling your used oil you not only help keep our water supply clean, but help reduce American dependence on foreign oil.

It takes 42 gallons of crude oil, but only one gallon of used oil, to produce 2.5 quarts of new motor oil. Many garages and auto-supply stores that sell motor oil also accept oil for recycling. You can also find a motor oil recycler near you at earth911.com.

Learn more about common recyclables by visiting <https://www.epa.gov/recycle/how-do-i-recycle-common-recyclables>.

Knowing is not enough; we must apply. Willing is not enough; we must do.
– Johann Wolfgang von Goethe

You were born to win, but to be a winner, you must plan to win, prepare to win, and expect to win.
– Zig Ziglar

BY THE NUMBERS

Gallons of soap delivered:

301,902,618

since 1984

Empty drums not in landfills:

5,489,138

since 1984
