

## Tire Pressure

Proper tire pressure is the most important part of maintaining your tires. It affects safety, their durability, and your fuel consumption. The National Highway Traffic Safety Administration offers the following advice regarding tire pressure:

- Check the pressure of all tires, including your spare, at least once a month when the tires are “cold,” meaning that the car hasn’t been driven for at least three hours.
- Your tires’ proper tire inflation pressure can be found on the Tire and Loading Information Label on the driver’s side door edge or in your owner’s manual. Remember, the correct pressure for your tire is what the vehicle manufacturer has listed, NOT what is listed on the tire itself.
- Keep a tire pressure gauge in your vehicle. A tire can suddenly lose pressure if you drive over a pothole or bump into a curb when you park.
- Newer vehicles have Tire Pressure Monitoring Systems, but these only activate a warning when a tire is significantly underinflated. You should still conduct a monthly tire pressure check to ensure your tires are always properly inflated.

## Industries We Serve

Our customers span a broad range of industries. A few of the industries we provide solutions for include Asphalt Release; Concrete Form Release; Floor Care; Food and Beverage; Odor Control; Oil Field Services; Parts Cleaning; Pulp, Paper, and Printing; Refineries and Petrochemical Plants; Vehicle Cleaning; and more!

What do they all share? A need for service, safety, efficiency, and control. Our network of Manufacturing Centers means you can expect local support and a quick response. Our refillable tank system eliminates the risks associated with receiving, handling, storing, and disposing of drums. Our remote inventory monitoring system tracks usage online, ensuring you never run out of product. Visit [chemstation.com](http://chemstation.com) to see how we can help provide solutions to your cleaning challenges.

## Food Safety Resource

Food plays a big role in holiday festivities, and all that cooking may come with some questions. For questions about preventing foodborne illness, safe food handling and storage, and safe preparation of meat, poultry, and egg products, try the resource from the USDA called “Ask USDA.” To search this knowledge base of common food safety questions, just go to [ask.usda.gov](http://ask.usda.gov) and use the search box.

If you have a question about meat, poultry, or egg products, you could also call the USDA Meat and Poultry Hotline at 1-888-674-6854 to speak with a food safety specialist. The Hotline is open on Thanksgiving Day from 8:00 a.m. to 2:00 p.m. (Eastern Time), so if you run into any turkey troubles, give them a call. Have a wonderful and safe Thanksgiving!

Happiness does not come from doing easy work but from the afterglow of satisfaction that comes after the achievement of a difficult task that demanded our best.  
— Theodore Isaac Rubin

Success is the sum of small efforts — repeated day in and day out.  
— Robert Collier

## BY THE NUMBERS

Gallons of soap delivered:

**315,757,548**

since 1984

Empty drums not in landfills:

**5,741,046**

since 1984
