

## See You in Atlanta!

The 2020 International Production & Processing Expo (IPPE) will be held January 28-30 at the Georgia World Congress Center in Atlanta, Georgia. IPPE is a collaboration of three shows – International Poultry Expo, International Feed Expo, and International Meat Expo – representing the entire chain of protein production and processing. This event will bring together more than 1,300 exhibitors and 32,000 visitors!

IPPE is the world's largest annual display of technology, equipment, supplies, and services used in the production and processing of eggs, meat, and poultry and those involved in feed manufacturing. A wide range of international decision-makers attend this annual event to network and become informed on the latest technological developments and issues facing the industry.

If you're planning to attend this event, please stop by and say hello to the ChemStation Team in Booth B7451 (B Hall)!

For more information about this event, visit [www.ippexpo.org](http://www.ippexpo.org).

## Dry Wood = Hotter Fire

Are you using dry wood in your fires? Not sure? Try using a moisture meter. According to the Burn Wise website, wet wood can create excessive smoke which is wasted fuel. Moisture meters for wood are available and can cost as little as \$20. Properly dried wood should have a reading of 20% or less.

For an accurate reading, they recommend splitting the wood and then testing the newly split side of the wood. Dry wood creates a hotter fire... and hotter fires save wood – ultimately saving you time and money.

Learn more at <https://www.epa.gov/burnwise> and check out their "Wet Wood is a Waste" video: <https://youtu.be/jM2WGgRcnm0>

## Our Partnership with You

From problem-solving to application training, ChemStation's philosophy is to find the best answer for our customers and to continue looking for improvement opportunities. ChemStation's "work with" partnership provides customized solutions for our customers' individual requirements.

The laboratory at ChemStation International has a full complement of chemists who specialize in the areas of Food & Beverage, Parts Cleaning, Vehicle Cleaning, and many other industries. Each member of the ChemStation laboratory has a background in new product development of finished detergents.

If you have a cleaning challenge, let us know! Learn more at [www.chemstation.com](http://www.chemstation.com).

Sometimes the best way to learn something is by doing it wrong and looking at what you did. – *Neil Gaiman*

The harder you work for something, the greater you'll feel when you achieve it. – *Author Unknown*

Happiness is not a matter of intensity but of balance, order, rhythm, and harmony. – *Thomas Merton*
