

ChemStation – We Are Here To Help

As the situation around novel coronavirus (COVID-19) continues to evolve, we are doing everything we can to ensure your safety and provide useful tools and information to keep your team safe. A few facts:

- ChemStation manufactures its products in North America close to local markets
- ChemStation has redundant manufacturing facilities for all of its products
- ChemStation has significant storage for all of its products at multiple locations
- ChemStation primarily sources its raw materials near its manufacturing plants

ChemStation offers a comprehensive suite of products including sanitizers, cleaners, and disinfectants, developed to stop the spread of disease. Our national network of Manufacturing Centers across North America is able to work together to offset many of the ongoing challenges in terms of transportation, logistics, and service.

For ChemStation + COVID-19 related materials and to access informational product flyers, please visit <https://fghq.us/C19Rsp>.

Steps of Sanitation

If your company has a food manufacturing facility, it is important to keep it sanitized to ensure freedom from disease and contaminants while maintaining a clean work environment for employees.

To ensure you are sanitizing correctly, follow these steps below:

1. Remove waste materials
2. Wrap electric
3. Pre-rinse
4. Wash and scrub
5. Rinse
6. Inspect
7. Sanitize
8. Remove excess moisture

Reach out to your local ChemStation rep for guidance and to answer any questions!

Composting Benefits

Instead of throwing away those food scraps and yard waste, why not make 2020 the year that you try composting!

There are many benefits of composting, including:

- Enriches soil, helping retain moisture and suppress plant diseases and pests
- Reduces the need for chemical fertilizers
- Encourages the production of beneficial bacteria and fungi that break down organic matter to create humus, a rich nutrient-filled material
- Reduces methane emissions from landfills and lowers your carbon footprint

Visit <https://www.epa.gov/recycle/composting-home#basics> for more information on composting – including all the basics, what “browns” and “greens” are, what to compost and what not to compost (and why).

You gain strength, courage, and confidence by every experience in which you really stop to look fear in the face. You are able to say to yourself, 'I lived through this horror. I can take the next thing that comes along.'

– Eleanor Roosevelt

Courage is what it takes to stand up and speak; courage is also what it takes to sit down and listen.

– Winston Churchill

BY THE NUMBERS

Gallons of soap delivered:

323,815,239

since 1984

Empty drums not in landfills:

5,887,549

since 1984
