

Delivering Soap and Sanitizer at a Social Distance

ChemStation has been making contact-free deliveries since before “contact-free” became a thing. It’s one of the many ways we are different from any other industrial cleaning chemical supplier.

- **Refillable Tanks:** No more employee handling, storing, and disposing of containers.
- **Efficient:** Products are delivered directly into the tank, where you need it and right when you need it.
- **More Control:** Equipment components such as proportioning systems can be implemented to reduce employee handling of drums, buckets, and bottles, whenever possible.

- **Telemetry:** Remote inventory monitoring and reporting for our tank systems. You’ll never run out of product and your employees don’t have to manually check the tanks.
- **Organized:** Cleaner, safer chemical rooms.
- **International Coverage:** 60+ locations across North America for a quick response time when you need it.

To learn more about how we are *Keeping it Clean and Contact-Free*, visit www.chemstation.com.

ChemStation Odor Control

ChemStation products are custom-formulated to solve cleaning challenges in many different industries, but did you know we provide odor control solutions as well?

Our odor control products are not just for landfills, portable restrooms, rendering plants, and transfer stations. Some customers have used city trucks to carry our product to use at spill sites, while others have added odor control to their water trucks to spray on city roads to keep towns smelling clean.

No matter the industry, if you have problems with malodors, the ChemStation System is your solution.

To learn more about ChemStation solutions, please visit www.chemstation.com.

Welcome to EnviroFlash

Exposure to high levels of air pollution can aggravate heart disease, asthma, and other respiratory diseases. By being aware of the air quality levels, you can take precautions to protect your family.

Like the weather, air quality can change from day to day, or even hour to hour. Up-to-date information allows you to make decisions based on air quality forecasts. EnviroFlash comes to you through a partnership between the US EPA and your state or local air quality agency.

EnviroFlash is a system that sends e-mails about your daily air quality forecast – notifying you about air quality so you don’t have to go searching for it! The message is the same air quality information that the local radio or television stations provide, plus suggested safety measures when levels are unhealthy. For additional information or to sign up, visit www.enviroflash.info.

Feeling gratitude and not expressing it is like wrapping a present and not giving it.
— William Arthur Ward

The secret of success is to do the common thing uncommonly well.
— John D. Rockefeller Jr.

Our words have power, but our actions shape our lives.
