

Our System is Your Solution

Warren Stoddard from our St. Louis location was able to help his customer add efficiency, safety, convenience, organization, and so much more to their facility.

Before ChemStation: The most significant issue this facility had was moving drums in and out of the room, which was inefficient and a safety concern. They had timed boxes that would overflow as they fill everything from one-gallon jugs to five-gallon jugs.

With ChemStation: Our system now pressurizes the fill stations. Therefore, the user can conveniently open and close a ball valve when they fill containers. It also depressurizes the pumps after two minutes to remove any potential safety concerns.

Does the “Before ChemStation” sound like your facility? Let ChemStation help remove any pains you encounter with some of the other chemical providers. The thought of change isn’t always easy, but we are with you every step of the way to make the process a smooth transition. As you can see, it will be well worth the difference.

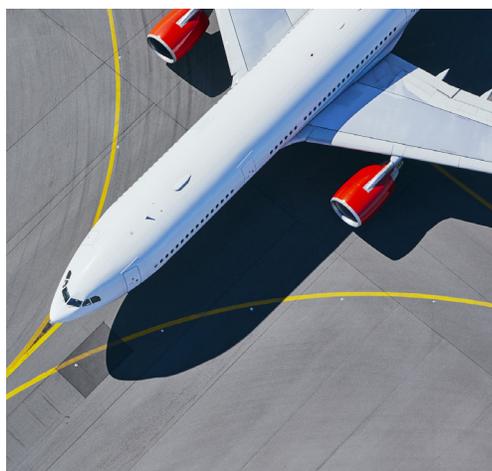

Electrical Safety Tips

Electrical safety is important at your place of business and at home. The U.S. Fire Administration offers the following electrical safety tips regarding extension cords, power strips and surge protectors:

- Replace worn, old or damaged extension cords right away.
- Use extension cords for temporary purposes only.
- Avoid putting cords where they can be damaged or pinched, like under a carpet or rug.
- Do not overload power strips.
- Use power strips that have internal overload protection.

Providing Solutions for the Airline Industry

Did you know that ChemStation has products designed to service the airline industry? We offer a complete solution for aircraft cleaning including exterior and general cleaners, degreasers, and carbon removers.

Recently, ChemStation Product 23100 became our second formulation to pass **Airbus AIMS09-00-002, Evaluation of Maintenance Materials**. 23100 can be used neat or 20% by volume as an exterior and general cleaner. This product also meets **Boeing Spec D6-17487 Revision P**.

The airline industry is just one of many industries that we service. Visit chemstation.com to learn how our custom-formulated products are used in other industries, too!

One’s philosophy is not best expressed in words; it is expressed in the choices one makes. And the choices we make are ultimately our responsibility.

— *Eleanor Roosevelt*

In the end, it is important to remember that we cannot become what we need to be by remaining what we are.

— *Max De Pree*
