

## Let's Get Personal

At ChemStation, we're all about getting personal. Our environmentally friendly, industrial cleaning products are custom-formulated taking into consideration the factors that only matter to your business – including the water conditions at each of your locations. That way you are getting a consistently clean and sanitized space every time!

ChemStation also delivers our products into unique refillable containers right at your facility, eliminating messy, crowded chemical rooms.

Find a ChemStation location near you by visiting <https://chemstation.com/about/locations/>. We can schedule a demo so that you can see how ChemStation's personalized approach makes sense for your business!

## Prevent Worker Hearing Loss

Hearing loss is among the most common work-related illnesses. One way the CDC recommends to prevent work-related hearing loss is to always wear hearing protection in noisy areas, and if using foam plugs to insert them correctly. To get the best protection from your soft foam earplugs, remember to roll, pull, and hold when putting them in. Always use clean hands to keep from getting dirt and germs into your ears.

1. **Roll** – Roll the earplug up into a small, thin “snake” with your fingers using one or both hands.
2. **Pull** – Pull the top of your ear up and back with your opposite hand to straighten out your ear canal. The rolled-up earplug should slide right in.
3. **Hold** – Hold the earplug in with your finger until it expands to fill the ear canal. Your voice will sound muffled when the plug has made a good seal.

Learn more about hearing loss prevention at [www.cdc.gov/niosh/topics/noise/default.html](http://www.cdc.gov/niosh/topics/noise/default.html).

## Food Safety Resource

Food plays a big role in holiday festivities, and all that cooking may come with some questions.

For questions about preventing foodborne illness, safe food handling and storage, and safe preparation of meat, poultry, and egg products, try the resource from the USDA called “Ask USDA.” To search this knowledge base of common food safety questions, just go to [ask.usda.gov](http://ask.usda.gov) and use the search box.

For example, when typing in “turkey,” you can find the answers to these questions:

- What is the safest way to thaw a frozen turkey?
- How long can a thawed turkey remain in the refrigerator after thawing?
- How long can you keep leftover cooked turkey?

If you run into any turkey troubles this year, check out this resource! Have a wonderful and safe Thanksgiving!

Knowing is not enough;  
we must apply. Wishing is  
not enough; we must do.
