

CHEMSTATION

## See You in Atlanta!

The 2023 International Production & Processing Expo (IPPE) will be held January 24-26 at the Georgia World Congress Center in Atlanta, Georgia. IPPE is a collaboration of three shows – International Poultry Expo, International Feed Expo, and International Meat Expo – representing the entire chain of protein production and processing. This event will have more than 1,000 exhibitors showcasing the latest technology and innovations from around the world!

IPPE is the world's largest annual display of technology, equipment, supplies, and services used in the production and processing of eggs, meat, and poultry and those involved in feed manufacturing. A wide range of international decision-makers attend this annual event to network and become informed on the latest technological developments and issues facing the industry.

If you're planning to attend this event, please stop by and say hello to the ChemStation Team in Booth C12657 (C Hall)! For more information about this event, visit [www.ippexpo.org](http://www.ippexpo.org).

## So Many Ways to Save

Looking to save in 2023? Here are just a few ways that ChemStation can help your company save:

- Our refillable delivery systems give lower manufacturing costs, lower energy usage, and less packaging.
- There are no containers to order, receive, store, move, or dispose.
- Custom formulation reduces over-ordering and product waste.
- Dispensing options proportion exact amounts needed to reduce waste.
- Manufacturing network processes orders quickly to lower logistics costs.
- Safety savings not having to move heavy packages at end-user sites.
- Just-in-time ordering and delivery reduces supply chain inefficiencies.
- No supply chain disruptions waiting for empty drums or totes.

## Winter Driving Safety

Depending on the amount of snow and ice your region gets, winter driving can be very dangerous. NHTSA (National Highway Traffic Safety Administration) and OSHA provide information on safe winter driving to help prevent motor vehicle injuries due to winter storms. Below are a few of their tips when preparing for a trip:

- **Maintain Your Car:** Check battery, tire tread, and windshield wipers, keep your windows clear, put no-freeze fluid in the washer reservoir, and check your antifreeze.
- **Have On Hand:** Flashlight, jumper cables, abrasive material (sand, kitty litter, floor mats), shovel, snow brush and ice scraper, warning devices (like flares) and blankets. For long trips, add food and water, medication and cell phone.
- **Stopped or Stalled?** Stay with your car, don't over exert, put bright markers on antenna or windows and shine dome light, and, if you run your car, clear exhaust pipe and run it just enough to stay warm.

I learned that we can do anything, but we can't do everything, at least not at the same time. So think of your priorities not in terms of what activities you do, but when you do them. Timing is everything.  
— Dan Millman

If your dream only includes you, it's too small.
