

INK MANUFACTURING

SAFE, EFFECTIVE SOLUTIONS

Whether you're scrubbing floors and walls, cleaning out ink pots, or wiping down equipment, ChemStation has the solution for you.

Our products are a combination of surfactants and supporting chemistries designed to effectively remove and solubilize water-based inks.

When used as directed our products will not harm painted, concrete and sealed concrete floors, or the surfaces of ink processing equipment.

ENVIRONMENTAL SOLUTIONS WITH A REFILLABLE DELIVERY SYSTEM:

- Eliminates potential environmental contamination from discarded containers
- No freight charges, container deposits, or disposal costs
- Product where you need it... when you need it
- Local manufacturing service support source

Environmental solutions with a refillable delivery system that eliminates potential environmental contamination from discarded containers.
