

# OIL FIELD SERVICES

ChemStation is your source for specialty chemical products for oil field services.

**CHEMSTATION**

## Benefits of ChemStation

- Clean your exterior radiators on the spot with our spray arch system and avoid the costs associated with pulling the trucks off the line.
- Our products thoroughly break down injection grease and clean completely, leaving no film.
- We can custom-formulate truck washes, equipment washes, radiator cleaners, rig washes, wireline degreasers, and cement removal products.
- Our refillable delivery system eliminates potential environmental contamination from discarded containers.

## Product Options

### Injection Grease Removal Products

- Dissolve rather than simply displacing injection grease so it will not re-solidify in draining pipes or catch basins.
- Clean vehicles without harming surfaces including high-polished chrome and cleans windows without leaving a film.
- Clean radiators on fracturing trucks without having to remove them from the trailer.
- May be used for cleaning wireline equipment.

### Cement Removal Products

- Remove cement from equipment, truck barrels, and truck bodies without metal erosion to vehicles.

### Oil Rig Cleaning Products

- Safe and effective heavy-duty degreasers used to clean oil rigs. These products are also effective on the sub base of the rig.

### General Products

- Products available for removing organic crude base.
- ChemStation has an abundance of general purpose products, degreasers, truck washes, and floor soaps.
- Custom products can be blended to meet your particular needs and specifications.
